AIVX 372 HD

The AIVX-372D is the unique combination of a High Definition multimedia player with hard drive, a multimedia Internet and PC network gateway, and of an IPTV decoder and Radio from your ADSL provider.

Equipped with a SIGMA DESIGN 8635 processor, one of the highest performing ones on the market, the AIVX-372 HD allows you to decode High resolution video files, such as H.264 (MKV), HD MPEG2 or HD WMV 9. Thanks to the Ethernet port or to WIFI N connection, the AIVX-372HD will have access to your network-connected PC's multimedia files (UPnP AV, Samba, FTP), and broadcast the videos, music and images stored on your PC's hard drive to the TV.

If you have an ADSL + TV subscription, the AIVX-372D knows how to recognize and decode the main operators' IPTV packages. You can also access Web TVs and Web Radios broadcasted on the Net.
